Hi Richard,

Sam found that IARC just put out a briefing note discussing their rationale for including only publicly-available studies and the inclusion of "real-world" exposures by evaluation of epidemiological studies (see here [http://governance.iarc.fr/ENG/Docs/BriefingGCSC\\_FINAL\\_29012018.pdf](http://governance.iarc.fr/ENG/Docs/BriefingGCSC_FINAL_29012018.pdf)).

She wanted to know if there is any issue with sharing to OCIR and OCSPP before the briefing. She thinks it might not be important, but they might want to be aware if they haven't seen it.

I thought you'd want to see it re: the directive.

Do you have any concerns with her sending forward or would you rather send it direct to Nancy?
